A designation of any State is an indication that all OAPI States have been designated. Note: only one designation fee is due regardless of the number of OAPI member states designated.

**Members of European Patent Convention (EPC) regional patent system. Either national patents or European patents for member States are available through PCT, except for France and Belgium, for which only European patents are available if PCT is used. Foreign Patent Data and Services

The United States Patent and Trademark Office (PTO) has entered into a one-year exchange agreement with Derwent, Ltd. for 1982 whereby, in exchange for special compilations of patent documents, the PTO obtains an English-language abstract for each "basic" disclosure of invention contained in newly issuing foreign patent documents shortly after publication. Also, to facilitate association of each abstract with the appropriate patent document and to expedite subsequent processing of the disclosures to the classified search file, the PTO obtains, along with the abstracts, a magnetic tape record of the bibliographic data which relates to substantially all patent documents issuing worldwide. The agreement also provides for receipt by the PTO of certain other distinct services and materials.

The PTO would welcome proposals from other interested suppliers to provide the same or equivalent materials and services. Proposals received by July 1, 1982, will be evaluated and considered by the Office for implementation beginning Jan. 1, 1983.

Additional information, including copies of the PTO-Derwent agreement, may be obtained from:
